

The Best Time to Switch From Winter to Summer Tires

Livonia, MICH (March 20, 2020) - The first day of spring brings warm weather, blossoming flowers and of course, the time to change from winter to summer tires. Regular tire maintenance is the best way to ensure complete safety on the roads.

Users will want to wait to change from winter to summer tires when temperatures are consistently at or above 45°F for more than a couple days at a time. This ensures that no colder weather is coming.

Read the tips below to ensure tire safety this spring:

ATEQ TPMS TOOLS PRESENTS:

Why Spring is the Best Time to Switch Tires

READ THE TIPS BELOW TO ENSURE SAFETY ON THE ROAD

OVERALL SAFETY

Regular tire maintenance is the best way to keep you and other drivers safe on the roads. If you have a dedicated set of tires for the changing seasons, make sure to stay on top of changing them.

IS THERE A SPECIFIC TIME TO CHANGE TIRES?

While there is not a mandatory, specific time to change from winter to spring/summer tires, it is recommended to change tires when temperatures are consistently at or above 45°F.

HOW DO I STORE TIRE INFORMATION?

The Quickset TPMS reset tool can store two sets of wheels for each car (summer and winter tires) and is limited to four cars.
